Subject: RE: Lumen IPP renewal 2027 – figures for the proposal

Dear Rainer,

Short update on Lumen. Tobias Frei has sent the Q3 figures (below). Before I put anything into the proposal, two things:

- The EUR 51,060 "saved" is against Lumen's own list price. I'll cross-check the average paid APC (EUR 2,080) against OpenAPC so you have an independent comparison.
- 27 of our researchers review or edit for Lumen, including Ana Ferreira as guest editor. Last time that point landed with the Board more than anything else. I'd like to name a few, but only with their OK. I'll ask them this week.

I'm aiming for one page, as you asked. Draft by 11 December so you have it well before the Board on 4 February.

The rest of the publisher figures are still coming in. Two portals haven't released their 2026 exports yet, so the comparison tab is half empty.

Best,
Miriam

Subject: FW: Lumen IPP renewal 2027 – figures for the proposal

Miriam,

Thanks. Useful, but I can't take this to the Board as it is. Prof. Aigner will ask three things: what do we pay, what would we pay without the agreement, and are we compliant with our OA policy and DFG. Altmetric she won't look at.

And please check their numbers. I don't want to present a publisher's figure we can't explain.

One page. Same format as the DEAL memo last year.

R.

Rainer, FYI: first figures from Lumen for the renewal. I'll turn them into something for the proposal. M.

Subject: RE: Lumen IPP renewal 2027 – figures for the proposal

Dear Dr. Kessler,

Thank you for your message. Happy to help with the renewal. Here are the figures for the University of Rheinfeld, January to September 2026:

- Articles published (corresponding author at Rheinfeld): 138
- Total at list price: EUR 338,100 (average list APC EUR 2,450)
- Total paid via the prepayment account: EUR 287,040 (average EUR 2,080)
- Savings through the IPP discount: EUR 51,060
- Articles meeting funder requirements: 93%
- Rheinfeld researchers active as reviewers or editors: 27
- Average citations per article (2022–2025 cohort): 6.4; Altmetric attention score above 20 for 31 articles

I've attached the Manuscripta export. I'm afraid a formatted report takes us a few weeks at this time of year; I can send one in early December if that helps.

Your prepayment balance is EUR 18,450 at the moment, which should last until about mid-December at the current rate.

Kind regards,
Tobias

Subject: Lumen IPP renewal 2027 – figures for the proposal

Dear Mr. Frei,

As you know, our IPP agreement ends on 31 March 2027. I'm preparing the renewal proposal for our director, and it goes to the Executive Board on 4 February.

Could you send me the 2026 figures for Rheinfeld: articles, what we paid against list price, funder compliance, and anything on our researchers' involvement as reviewers or editors? A PDF I can forward would be ideal. I'd rather not rebuild it from the Manuscripta export again.

Many thanks and best regards,
Miriam Kessler
