Lumen IPP Value Sprint

Simulated design sprint up to 4-part sketching – plus test guide

4 sprint members · 3 experts · 6 personas · October 2026

All people, institutions, quotes and figures are fictional – created for a sprint simulation with sprintbox.ai.

OVERVIEW

The sprint at a glance

SPRINT CHALLENGE

“How might we help librarians at our partner institutions recognize the value of their agreement with Lumen Scholarly Publishing and demonstrate it convincingly to the budget holders at their institution?”

LONG-TERM GOAL (2 YEARS)

Renewal, because evidence of value reaches decision-makers without manual effort – and more partners expand.

PHASE 1 Stakeholder Briefing	PHASE 2 Understand & Frame	PHASE 3 Ideate & Explore
1.1 Context material	2.1 Defining the challenge	3.1 Lightning demos (team + AI)
1.2 Interview guide	2.2 Expert interviews (3×)	3.2 Notes
1.3 Stakeholder invitation	2.3 AI synthesis of the interviews	3.3 Doodles
1.4 Briefing synthesis	2.4 HMW session	3.4 Crazy 8s
1.5 Briefing sign-off	2.5 Map & Target Area	3.5 Solution Sketch
	2.6 Long Term Goal & Sprint Questions	3.6 Additional AI concepts

→ Next: Decide & Align (not simulated) · Outlook phase 4: test guide and start of the persona interviews

Step with AI contribution · Sequence per sprint variant matrix (classic design sprint, with AI)

CAST

Sprint team and experts

SPRINT TEAM (LUMEN)

CI — Clara Imhof
Head of Partnerships Europe, Lumen Basel

Decider

"I want to know which evidence actually triggers a renewal."

TF — Tobias Frei
Partnership Manager DACH, looks after 52 institutions

Sprint member · Customer

"Today I build renewal reports by hand – around 5 hours per institution."

NK — Nina Kovač
Product Owner, Manuscripta partner dashboard

Sprint member · Product

"Only about one partner in eight logs in to Manuscripta each month."

SO — Samuel Ott
Bibliometrics & data analytics

Sprint member · Data

"Citations, Altmetric, policy mentions – we have the data, but not the story."

EXTERNAL EXPERTS AND FACILITATION

MK — Dr. Miriam Kessler
OA Coordinator, University Library, Rheinfeld (DE)

Expert · User

"I write the renewal proposal for our director."

RH — Dr. Rainer Hollmann
Director, University Library, Rheinfeld (DE)

Expert · Budget

"I own the acquisitions budget and take agreements to the Executive Board."

US — Ulrike Sandmann
Head of Licensing, Southern Library Consortium (14 inst.)

Expert · Market & policy

"I negotiate framework terms for all 14 members."

AB — Alexander Boll
Sprint coach, sprintbox.ai · Facilitator

sprintbox AI agent
Synthesis, lightning demos, additional concepts

PHASE 1

Stakeholder Briefing

01

1.1 Context material

1.2 Interview guide

1.3 Stakeholder invitation & agenda

1.4 Briefing synthesis (AI)

1.5 Briefing sign-off

What the team needs to know before the sprint

The IPP model

APC discounts for affiliated authors; central payment via collective invoicing or a prepayment account.

The contacts

Librarians and data stewards – rarely in control of the budget, but expected to justify the partnership internally.

The tool today

Manuscripta dashboard with submissions, status, APCs, discounts and CSV export – an invoicing tool, not evidence of value.

Renewal today

The IPP team partly builds reports by hand, e.g. with Altmetric. Librarians are reluctant to log in and want ready-made reports.

Possible kinds of value

Savings · Impact (citations, Altmetric, policy) · OA and open data compliance · Involvement as reviewers or editors.

Goal in two years

Renewal, because evidence of value reaches decision-makers without manual effort – and more partners expand.

Source: Lumen sprint challenge (briefing document)

PHASE 1 · STEP 1.2 · INTERVIEW GUIDE

Three roles, three guides

For everyone (5 min): Role, responsibilities and how the last renewal went · Format: 40 min remote, notes taken by the AI agent

MK

Dr. Miriam Kessler

Expert · User

1. How do you prepare the renewal of a publisher agreement?
2. Which figures do you pull from where today – and how long does it take?
3. What convinced a decision-maker last time – or didn't?
4. When and why do you log in to publisher portals?

RH

Dr. Rainer Hollmann

Expert · Budget

1. What criteria do you use to renew or cancel agreements?
2. What form must evidence of value take for you to pass it on?
3. What makes you suspicious of publisher figures?
4. What would make you expand an agreement?

US

Ulrike Sandmann

Expert · Market & policy

1. How do consortia compare the value of OA agreements?
2. Which metrics are standard (e.g. cost per article)?
3. What role do funder requirements play?
4. What separates good publisher reports from bad ones?

Invitation to the experts and agenda

New message

To: Dr. M. Kessler, Dr. R. Hollmann, U. Sandmann
Subject: Expert interview (40 min) on the value of OA partnerships

Hello

We'd like to understand how libraries demonstrate the value of their open access partnerships to budget holders – and what they really need to do so.

Could we interview you for 40 minutes by video on sprint day 1, between 09:30 and 12:00? No preparation needed; we'll send three guiding questions in advance.

Kind regards
Clara Imhof, Head of Institutional Partnerships Europe

Day 1

- **09:00** Kick-off & Challenge
- **09:30** Expert interviews 3 × 40 min
- **12:00** AI synthesis of the interviews
- **13:30** HMW session & voting
- **14:30** Map & Target Area
- **15:30** Long Term Goal & Sprint Questions
- **16:15** Lightning demos (team)

Day 2

- **09:00** Lightning demos (AI)
- **09:30** Notes
- **09:50** Doodles
- **10:10** Crazy 8s
- **10:20** Solution Sketch
- **11:15** Additional AI concepts & gallery
- **13:30** → Decide & Align (not simulated)

Understand & Frame · Ideate & Explore · AI step

AI

AI synthesis of the briefing

What we know	Assumptions we test	Knowledge gaps & risks
IPP offers discounts, collective invoicing or prepayment	Librarians want reports, not logins	Which kind of value counts how much in the decision?
Contacts rarely control a budget themselves	Savings are the strongest argument	Who decides: library or Executive Board?
Manuscripta is an invoicing tool, not evidence of value	Decision-makers read one page at most	Risk: publisher figures look like advertising
Renewal reports are partly built by hand	Impact figures convince research leadership	Risk: data protection for reviewer and editor data

PHASE 1 · STEP 1.5 · BRIEFING SIGN-OFF

Briefing signed off – with a clear scope

- ✓ Challenge and goal agreed with the Decider
- ✓ 3 experts confirmed: user, budget, market & policy
- ✓ Context material shared with the team
- ✓ Data: Manuscripta exports, Altmetric, invoices (anonymised)
- ✓ Roles: Decider, facilitator, 3 members, AI agent
- ✓ Agenda for days 1 and 2 confirmed

CI

Clara Imhof · Decider

signed off the briefing the day before

SIGNED OFF

In scope

- Evidence of value: library → budget holders
- Automated reports and formats
- Choice of metrics

Out of scope

- Prices and discount levels
- Redesign of the submission process
- Comparison with other publishers

Success criterion: Concepts work without manual effort from the IPP team.

PHASE 2

Understand & Frame

02

2.1 Defining the challenge

2.2 Expert interviews (3×)

2.3 AI synthesis of the interviews

2.4 HMW session & voting

2.5 Map & Target Area

2.6 Long Term Goal & Sprint Questions

The challenge, sharpened

BEFORE · ORIGINAL

"How might we help librarians at our partner institutions recognize the value of their agreement with Lumen Scholarly Publishing and demonstrate it convincingly to the budget holders at their institution?"

AFTER · SHARPENED

How might we automatically equip librarians with credible, forwardable evidence of value that convinces budget holders in the renewal decision?

TERMS CLARIFIED

"Value"

Savings, compliance with OA strategy and funder requirements, impact, involvement of own researchers

"Budget holders"

Library director and Executive Board (Vice-President for Research) – not the contact person

"Automatically"

Generated from Manuscripta and invoice data, with no manual work by the IPP team

PHASE 2 · STEP 2.2 · EXPERT INTERVIEW 1/3

Interview: Dr. Miriam Kessler

MK

Expert · User

OA Coordinator, University Library, Rheinfeld (DE)

KEY MESSAGE

I need evidence of value I can pass on without reworking it.

- Coordinates ~1,400 OA publications a year across 11 publishers
- No budget of her own – writes the proposal for the director
- Uses Manuscripta about three times a year

> *I log in to Manuscripta maybe three times a year – usually when the prepayment account is running low.*

> *For the proposal I copy figures from six publisher portals into a spreadsheet. That's two full days.*

> *Dr. Hollmann doesn't read dashboards. He wants one page he can take to the Executive Board.*

> *What worked last time: Dr. Ferreira is a guest editor at Lumen. Nobody on the Executive Board knew.*

HMW NOTES FROM THE INTERVIEW

HMW deliver the evidence so it drops straight into the proposal?

HMW make our guest editors and reviewers visible?

HMW make the two days of spreadsheet work unnecessary?

Interview: Dr. Rainer Hollmann

RH

Expert · Budget

Director, University Library, Rheinfeld (DE)

KEY MESSAGE

One page, cost versus benefit – with the method disclosed.

- Acquisitions budget approx. EUR 6.5m
- Responsible for around 40 publisher agreements
- Takes renewals to the Executive Board

> *I want one page: what do we pay, what do we get – and what would it cost without the agreement?*

> *I double-check any figures a publisher reports about itself. No method, no trust.*

> *Prof. Aigner doesn't ask about Altmetric. She asks whether we meet our OA strategy and DFG requirements.*

> *I'd top up the prepayment if demand rises and the budget stays predictable.*

HMW NOTES FROM THE INTERVIEW

HMW show cost per article with and without the agreement?

HMW disclose our calculation method?

HMW prove compliance with OA strategy and funder requirements?

Interview: Ulrike Sandmann

US

Expert · Market & policy

Head of Licensing and Consortium Negotiations, Southern Library Consortium

KEY MESSAGE

Without comparability there is no argument.

- Negotiates for 14 institutions
- Runs cross-publisher OA monitoring
- Rates agreements by cost per article

> *We calculate every agreement the same way: cost per article, OA share, flexibility.*

> *A publisher report in its own layout has to be reworked first. I need a standard format for our monitoring.*

> *My members ask: where do we stand compared with similar institutions?*

> *Funders require OA and open data. Anyone who can prove it has a strong argument.*

HMW NOTES FROM THE INTERVIEW

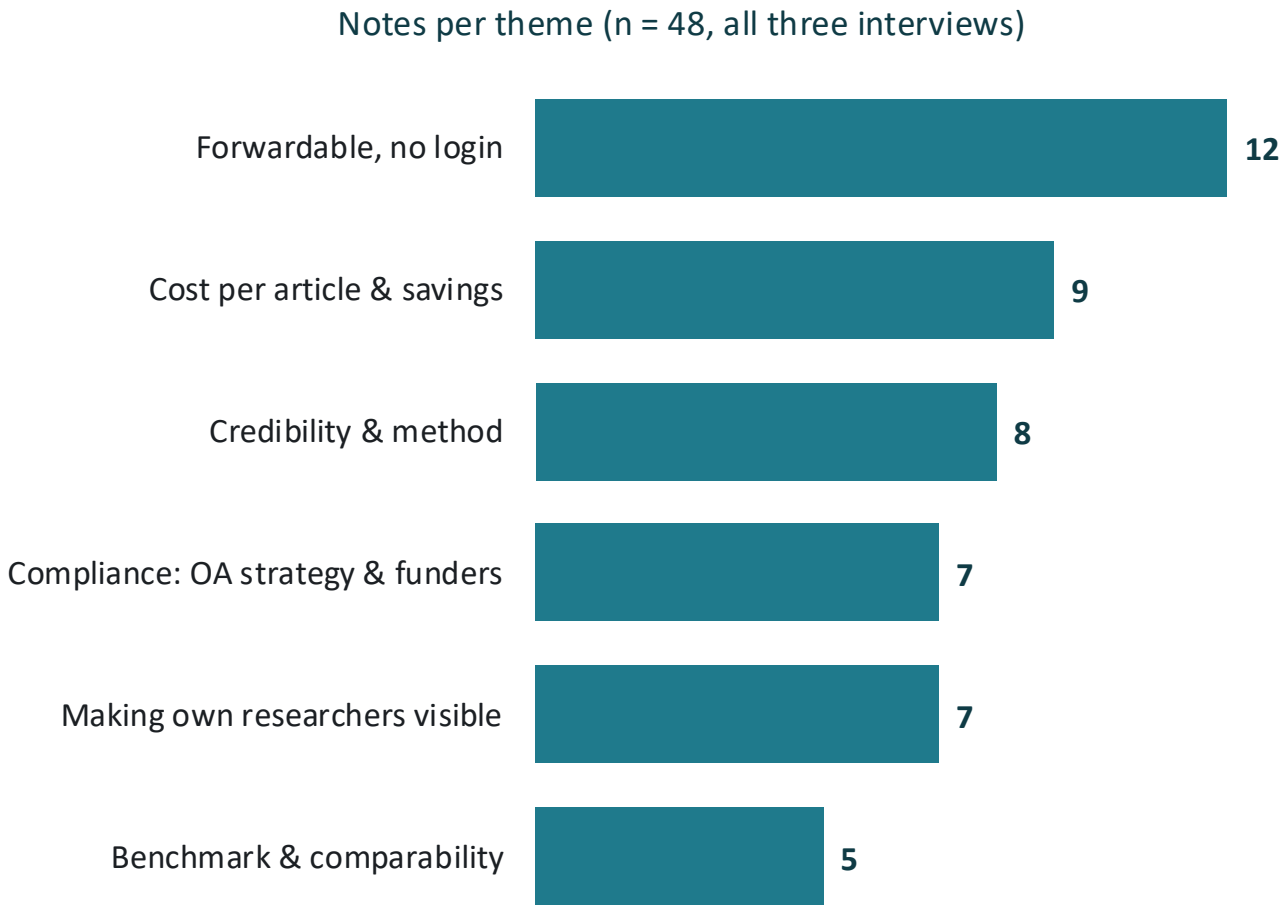

HMW deliver reports in a standard format consortia can adopt?

HMW offer fair benchmarks against similar institutions?

HMW prove funder compliance automatically?

AI

Six themes from 48 notes

Surprise

All three ranked impact figures (citations, Altmetric) – assumed internally to be the main argument – as secondary. Stronger than expected: own researchers as editors.

Pattern across all interviews

Nobody wants another dashboard. What's needed are ready-made, verifiable formats that reach decision-makers without rework.

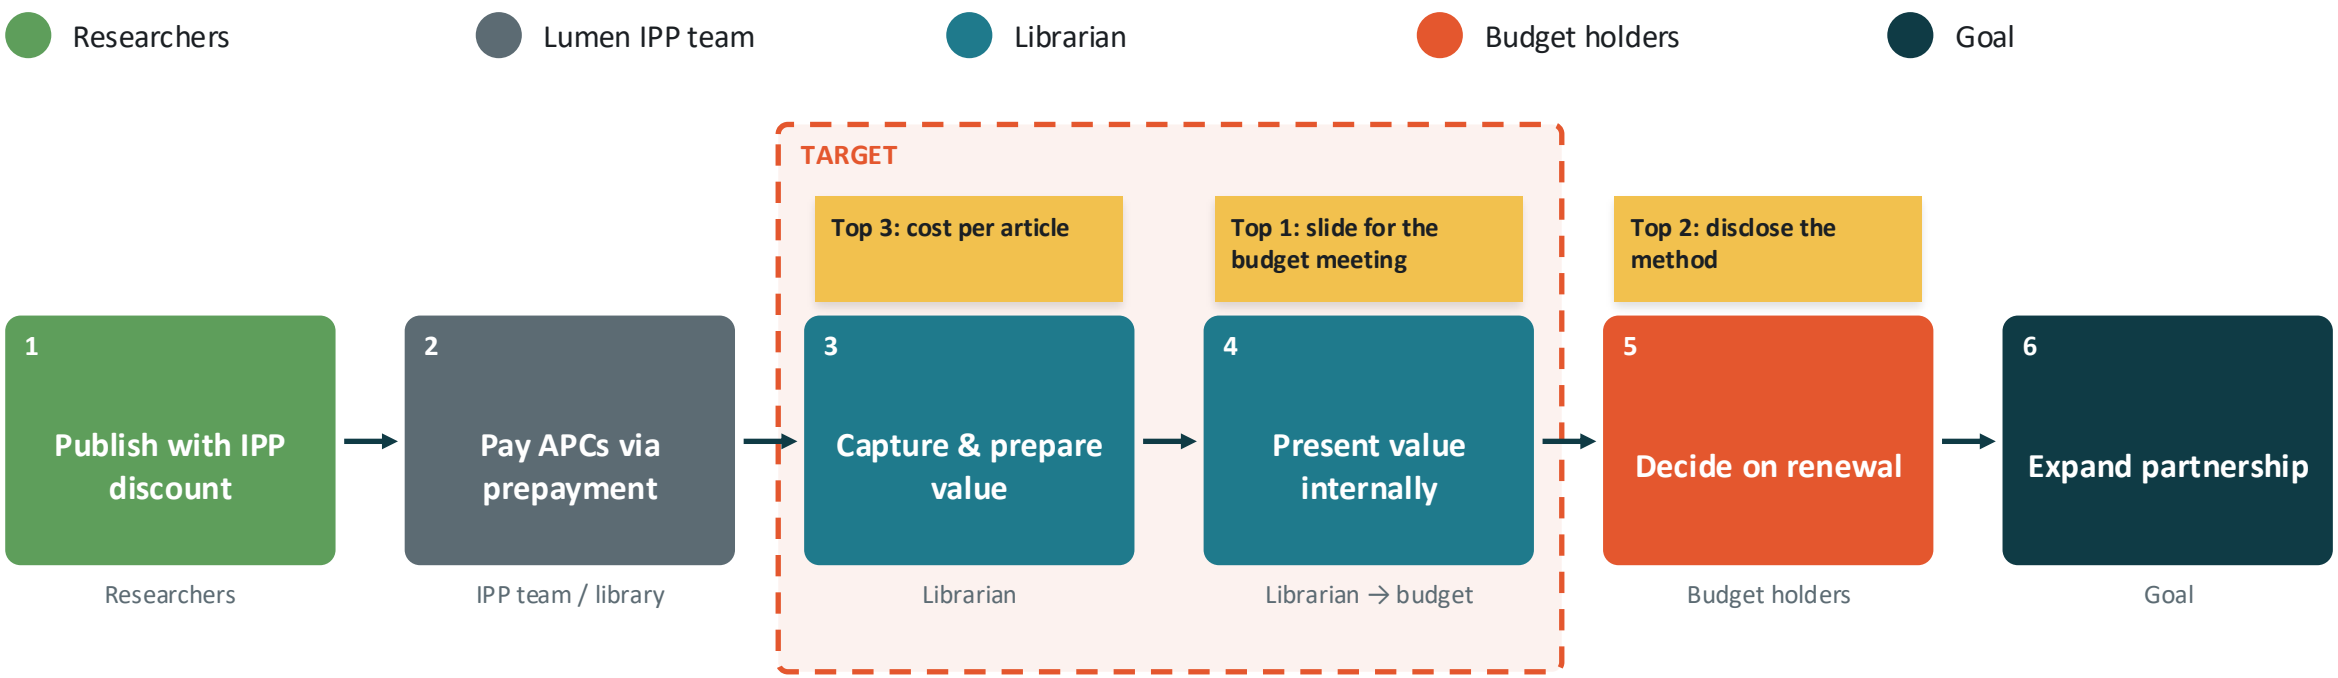

PHASE 2 · STEP 2.4 · HMW SESSION & VOTING

How might we …? – clustered and voted

Format & access	Credibility	Cost	Compliance	People	Benchmark
HMW turn the evidence into a slide that goes straight into the budget meeting? ●●●●● TOP 1	HMW disclose our calculation so budget holders trust it? ●●●● TOP 2	HMW make cost per article comparable with and without the agreement? ●●● TOP 3	HMW automatically show how well the agreement meets OA strategy and funder requirements? ●●	HMW make our own researchers' work as reviewers and editors visible? ●	HMW offer a fair comparison with similar institutions?
HMW make logins unnecessary for librarians? ●	HMW have the figures confirmed independently?	HMW include a budget forecast for next year?	HMW provide machine-readable data for OA monitoring?	HMW turn researchers into advocates?	HMW show growing demand from researchers?

● = 1 dot · 16 dots (4 per sprint member) · The top 3 go on the map

The map: from article to renewal

CI

Decider's target choice: We focus on the moment the evidence of value travels from the library to the budget holders (steps 3–4). That's exactly where manual work and loss of credibility happen today.

The goal and the questions we must answer

LONG-TERM GOAL

In two years, partner institutions renew their IPP agreement because credible evidence of value reaches decision-makers without manual effort – and a growing share expand the partnership.

Drafted by Clara, confirmed by the team by consensus

SPRINT QUESTIONS · "What could make us fail?"

- **SQ1** Do we deliver evidence of value that librarians forward without changes?
- **SQ2** Do budget holders trust figures that come from the publisher itself?
- **SQ3** Which kind of value tips the renewal decision?
- **SQ4** Can the evidence be generated fully automatically from Manuscripta data?
- **SQ5** Does the evidence spark interest in expanding, e.g. more prepayment?

PHASE 3

Ideate & Explore

03

3.1 Lightning demos (team + AI)

3.2 4-part sketching: process

PHASE 3 · STEP 3.1 · LIGHTNING DEMOS (TEAM)

Inspiration from other industries

by Tobias

A music app's year in review

A personal review, told with emotion and made for sharing.

BIG IDEA
An institutional year in review people proudly pass on

by Nina

Electricity bill with neighbourhood comparison

“You use 12% less than similar households” – the comparison gives context.

BIG IDEA
Peer benchmark with comparable institutions

by Clara

Annual bank statement

Fees, interest, balance: sober, trustworthy, every line verifiable.

BIG IDEA
A statement: list price, paid, saved

by Samuel

Energy label

A standardised scale at a glance; the calculation method is public.

BIG IDEA
A value label with a disclosed method

AI

What the AI agent contributed

by the AI agent

Scheduled PDF reports from analytics tools

The report arrives by email automatically on a set schedule – no login needed.

BIG IDEA
Push, not pull: value report in the inbox

by the AI agent

Weekly insight emails from writing apps

One headline number, one comparison, one tip – read in ten seconds.

BIG IDEA
Short and regular, with one headline number

by the AI agent

National OA monitoring platforms

Cross-publisher, with standardised data fields and an open method.

BIG IDEA
Export in the monitoring standard

by the AI agent

Board pack generators for committees

Live data becomes finished slides in the organisation's own design.

BIG IDEA
Slide in the institution's branding in one click

Four steps, alone together

1. Notes

20 min

Note the key points from the map, interviews, HMWs and demos.

2. Doodles

20 min

Rough out first ideas: screens, diagrams, words.

3. Crazy 8s

8 min

Eight variations of the strongest ideas, one minute per frame.

4. Solution Sketch

45 min

A self-explanatory three-panel storyboard, with a title.

GROUND RULES

- **Everyone works alone**
- **Sketches stay anonymous**
- **Ugly is OK**
- **Words matter – write clearly**

What each person takes from the walls

CI Clara Imhof

LTG: renewal without manual work

SQ2: trust in publisher figures

Cost per article vs. list price

Demo: annual bank statement

Expansion = more prepayment

TF Tobias Frei

“One page for the board”

Nobody knew the guest editor

Timing: before the renewal

Demo: year in review

Forward to the director

NK Nina Kovač

Hardly any logins → push

Manuscripta data covers the basics

Peer benchmark

Demo: insights email

Choose recipients yourself

SO Samuel Ott

Disclose the method

Compliance beats impact

Prove funder compliance

Answers: SQ2 SQ3

AI

Two concepts from the AI agent

SQ1 SQ4

C1 · Report agent on demand

The librarian writes: “Slide for the board on 4 February, focus on cost.” The agent builds it from Manuscripta data – including method and sources.

1. Request by email or chat
2. Agent picks suitable metrics
3. Slide and sources back in minutes

SQ2 SQ3

C2 · Researcher voices

After each publication, a one-click question to the authors: “How important was having the cost covered?” Real, approved answers flow into the report as quotes.

1. Short survey after publication
2. Authors approve quotes
3. Quotes appear in the renewal kit

Optional matrix step “additional AI concepts” – both go into the heatmap on equal terms with the four team sketches.

PHASE 3 · RESULT

Six concepts for Decide & Align

	SQ1 Forwardable	SQ2 Trust	SQ3 Kind of value	SQ4 Automatic	SQ5 Expansion
Partnership statement	○	●	○	●	●
Renewal kit	●	○	●	●	○
Value email, no login	●	○	○	●	○
Compliance proof	○	●	●	○	○
Report agent on demand AI	●	○	○	●	○
Researcher voices AI	○	●	●	○	○

● = concept answers the sprint question

HANDOVER TO DECIDE & ALIGN

1. Gallery: put up all 6 sketches
2. Heatmap vote (silent)
3. Short solution presentation
4. Team straw poll
5. Supervote by Clara

Coverage suggests: the renewal kit and the partnership statement answer the most sprint questions.

PHASE 4

Prepare the test

04

4.1 Test candidate: renewal kit

4.2 Test guide: structure

4.3 Test guide: tasks & questions

4.4 Personas for the interviews

4.5 Interview kick-off & schedule

What the test must find out about the renewal kit

TEST CANDIDATE

The renewal kit: 90 days before the agreement ends, a finished slide in the university's branding is ready – with savings, funder compliance and the university's own researchers at Lumen.

Provisional choice based on SQ coverage – Decide & Align still to come

WHAT TO OBSERVE IN THE TEST · "What do we need to see?"

- **SQ1** Do Miriam and Jonas forward the kit unchanged – or rework it?
- **SQ2** Do Rainer and Sabine ask about the method – and is the link enough for them?
- **SQ3** Which tile do decision-makers read first: savings, compliance or people?
- **SQ4** Do they miss details Manuscripta can't provide, so someone adds them by hand?
- **SQ5** Does the kit prompt a question about expanding, e.g. more prepayment?

One session, four parts, 50 minutes

5 min

1. Welcome

Introduce the session, ask for consent to record, explain thinking aloud.

10 min

2. Context

Role, the last renewal, who decided and what convinced them.

25 min

3. Prototype tasks

Three tasks with the renewal kit, in the persona's own workflow.

10 min

4. Debrief

Overall verdict, what's missing, what they would forward as it is.

GROUND RULES

- **We test the kit, not you**
- **Think aloud, all the time**
- **Ask why – never lead**
- **Silence is fine – wait**

Three tasks, four questions each

Scenario: It's early January 2027. Rheinfeld's agreement with Lumen expires on 31 March. This email arrives: “Your renewal kit is ready.”

T1 · Task 1 · Receive the kit

Checks SQ1 · SQ4

1. This email arrives. What do you do first?
2. What do you expect to find before you open the kit?
3. Which figure do you look at first – and why?
4. Is anything missing that you'd have to add by hand?

T2 · Task 2 · Pass it on

Checks SQ1 · SQ2

1. You need to brief your director. Show us how.
2. Would you send the slide as it is? What would you change?
3. Which number would you check before forwarding – and how?
4. Who else at your institution should receive this?

T3 · Task 3 · Make the case

Checks SQ3 · SQ5

1. Picture the renewal meeting. Which tile makes your case?
2. What would a sceptical vice-president ask about this slide?
3. Does the method link convince you? What's missing?
4. Would this change your view on expanding the agreement?

PHASE 4 · STEP 4.4 · PERSONAS

Six personas for the test interviews

UNIVERSITY OF RHEINFELD · THE DECISION CHAIN FROM AUTHOR TO SIGNATURE

MK

Dr. Miriam Kessler

P1 · OA Coordinator, Library · writes the proposal

Tasks 1 · 2

"Evidence of value without manual work, ready to pass on."

RH

Dr. Rainer Hollmann

P3 · Library Director · holds the budget

Tasks 2 · 3

"One page: cost versus benefit, compared with other publishers."

SA

Prof. Dr. Sabine Aigner

P4 · Vice-President for Research · signs

Task 3

"What does this do for our reputation? I'm wary of publisher claims."

AF

Dr. Ana Ferreira

P6 · Group Leader, Env. Chemistry · guest editor

Tasks 1 · 3

"I want to publish fast – and see my review work recognised."

CONTRAST PERSONAS · INTERVIEWER · TWIN FACTORY

JB

Jonas Brändli

P2 · Data Steward, Aaretal UAS (CH) · recommends

Tasks 1 · 2

"Minimal effort – and proof of SNSF and open data compliance."

US

Ulrike Sandmann

P5 · Head of Licensing, consortium of 14 · negotiates

Tasks 1 · 3

"Comparable metrics across institutions and publishers."
