Assumptions report · Lumen renewal kit · Screen S1 (email)

EXAMPLE – fictional results from six persona-twin sessions with the short interview guide. Only the email (S1) was shown, so only the assumptions it can answer are here.

Persons interviewed	Target	Confirmed	Mixed	Rejected
6	6	1	2	0

Assumptions

A1 Librarians like the email in principle and see no problem forwarding it

“What do you think of it?” · “Do you see any problem in forwarding it?”

Metric	Confirmed at	Rejected below	Result	n	Status	What we learned
Share who like it in principle AND see no blocking problem	≥ 67%	< 50%	**50%**	6	**Mixed**	Half say yes without a catch. The director, the VP and the consortium each see a problem: no comparison, no named checker.

A2 Push beats login: people act on the email

Observed: do they open, download or forward without a prompt?

Metric	Confirmed at	Rejected below	Result	n	Status	What we learned
Share who act on the email without a prompt	≥ 83%	< 67%	**67%**	6	**Mixed**	Four of six act at once. Ana read it as marketing: sender and subject must say “your library”.

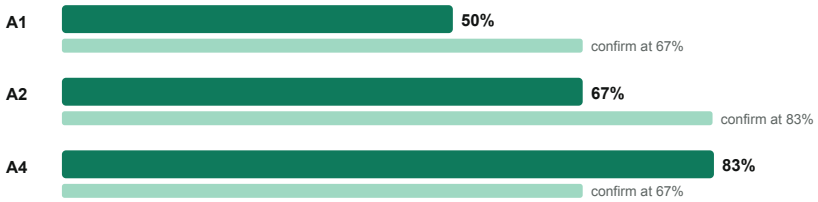

A4 Savings and our own researchers convince, not impact

“Which figure would convince your decision-makers most?”

Metric	Confirmed at	Rejected below	Result	n	Status	What we learned
Share naming Savings or Researchers	≥ 67%	< 50%	**83%**	6	**Confirmed**	Five of six pick savings or people. Only the data steward picks funder compliance (SNSF).

Status rule: Confirmed if Result ≥ Confirmed at · Rejected if Result < Rejected below · Mixed in between. A3 (method), A5 (completeness) and A6 (expansion) need screens S2–S5 and are left out of this round.

Figure · Result against the confirm threshold

Dark bar: share of interviews that met the assumption. Light bar: threshold to call it confirmed.

Observations · one row per interview

Session	Persona	Likes it in principle	Blocking problem to forward	Acted without prompt	Most convincing figure	Change marked on the prototype	Quote
S01	P1 Dr. Miriam Kessler	Y	N	Y	Savings	Add the board meeting date and a link to the method.	*“This saves me two days – if I can add the meeting date.”*
S02	P3 Dr. Rainer Hollmann	Y	Y	Y	Savings	Show what we would pay without the agreement.	*“One page is right. I'd still want to know how other publishers compare.”*
S03	P4 Prof. Dr. Sabine Aigner	N	Y	N	Researchers	Say who checked the numbers.	*“I'd sign this – but I'd ask who checked the numbers.”*
S04	P6 Dr. Ana Ferreira	Y	N	N	Researchers	Sender should be the library, not Lumen marketing.	*“Seeing my editing work recognised is a first.”*
S05	P2 Jonas Brändli	Y	N	Y	Funder compliance	Add SNSF to the funder figure.	*“Without SNSF I'd still have to build my own table.”*
S06	P5 Ulrike Sandmann	N	Y	Y	Savings	Same figures for every publisher.	*“Good for one university. For 14 I need the same figures from every publisher.”*
